102. Binary Tree Level Order Traversal

102 Binary Tree Level Order Traversal

• Breadth-first Search + Queue + Tree

Description

```
Given a binary tree, return the level order traversal of its nodes' values. (ie, from left to right, level by level).

For example:

Given binary tree [3,9,20,null,null,15,7],

3
/\
9 20
/\
15 7

return its level order traversal as:

[[3],
[9,20],
[15,7]]
```

- 1. Thought line
- 2. Breadth-first Search + Queue + Tree

```
if (que.front()->right!=nullptr) tempQue.push(que.front()->right);
    que.pop();
}
if(!tempVec.empty()) result.push_back(tempVec);
else break;
if(!tempQue.empty()) que.swap(tempQue);
else break;
}
return result;
}
```
